

**WE
ARE
LOOKING
FOR
GREAT
MINDS.**

We have been developing premium apps and digital platforms since 2007. From idea to launch and beyond, we are in close contact with our customers. Transparency, short communication channels and an agile project management is what makes TDSOFTWARE successful.

Software Developer Backend/ Middleware (w/m/d)

Full-time
employee

Entry Level

Jena

Our middleware team uses the most advanced platforms and languages to develop innovative solutions for our customers. Quality of work, sustainability and further development of the backend are in the foreground. At our location in Jena you will be in charge of the backend for an international blockchain project.

develop and maintain backend systems for applications (mobile apps and web apps)
extend and improve existing backend systems and their development methodology
accompanying and optimizing the integration of backend modules in mobile apps

Who we are looking for

- a degree in computer science or comparable education
- first professional experience in software development and the development of backend /CMS / middleware
- Passion for software development and new technologies
- Strong communication skills and enjoyment of

What you can expect

- a varied job in an experienced and ambitious team
good opportunities for further training and room for your own ideas
- a pleasant working atmosphere with flat hierarchies
- a workplace in the heart of Jena, equipped with the latest technology

working in an interdisciplinary team

Resilience - you keep a cool head even in stressful situations

- good knowledge of German and / or English
- Experience in the following topics is an advantage:
 - Programming with Java (Spring Boot)
 - Javascript (NodeJS, VueJS)
 - MySQL databases and MongoDB
 - Setup and maintenance of servers (SSH, NGINX, etc.)
 - Git and the IDE IntelliJ IDEA
