PRODUKTION

Mediengestalter Digital (m/w/d)

You are a very experienced data scientist in the Python environment and looking for new challenges? Then you are exactly right with us! Join the snapADDY team and work with us on new and exciting products.

Your daily doing will involve

- Co-development and further development of our intelligent address parser, which ensures the correct recognition of contact data in our products

- Wide range of tasks around the recognition of contact data from various sources

- Proactive introduction of improvement ideas from the field of machine learning and deep learning into existing projects

- As part of an agile team you will have your own responsibilities and tasks

- Close cooperation with your colleagues in our existing data team

Technologies we use:

- Python 3 (especially with NLTK and Keras), Web Crawling/Scraping, Flask, REST APIs, PostgreSQL

- Github, Travis CI, Slack, Agile Project Management

- Amazon Web Services (AWS), Ubuntu Server

Your profile

- At least 3 years of experience in data science and Python development

- Very good academic degree in a relevant course of studies in the field of Data Science / Machine Learning / Computer Science

- Secure overview of state-of-the-art methods in the field of machine learning

- Modern software development with Python 3

- Experience in setup, architecture and especially productive operation of large AI projects in Python

- The ability to bring ideas not only to proof-of-concept, but also to production

- High quality standards and an independent, proactive and solution-oriented approach

- Structured, analytical and independent work with a hands-on mentality

- Fun, good ideas and a sense of responsibility when dealing with large amounts of data

What we can offer

- ✓ Your own exciting field of responsibility, which you can advance significantly

- ✓ Varied tasks in a motivated and dynamic team

- ✓ Work in a rapidly growing and successful tech start-up with flat hierarchies

- ✓ Working with the latest technologies in the top equipped 750 m² office in the city center of Würzburg

- ✓ Regular training and an international team

- ✓ Free water, coffee and snacks, as well as monthly team events with pizza and beer

- ✓ The best colleagues of the whole city

About snapADDY

snapADDY develops SaaS software to digitize the world of sales. With our products, we help businesses to automatically capture contacts and leads at trade fairs and in everyday life. This way, we reduce the unnecessary and inconvenient work of manually entering of contacts and improve the data quality in CRM systems. Our software solutions are very popular and are currently used in production by more than 1.000 customers: from start-ups to medium-sized companies

to DAX corporations.

Since the foundation in 2015, the successful tech start-up has grown to a team of over 50 international people. Our mission is to become the world's leading company in automatically keeping CRM systems up-to-date and offering the qualitatively best way to capture contacts and leads.

Gregor Stellnberger, Customer Support Engineer
Gregor ist bei snapADDY für die HR-Themen zuständig. Du möchtest dich bewerben und hast noch Fragen zum Prozess? Kein Problem! **Gregor steht dir gerne mit Rat und Tat zur Seite.**
